Structural
Steel Building
Construction to
New Heights

GAYATHI

Building it better with steel

www.gayathi.com

ABOUT THE COMPANY

**Dedicated to
building customer loyalty and
lasting relationships**

Gayathi is a building construction firm established in Dubai in 2005. As well as having an office in Abu Dhabi, the company has a strong presence in the region focusing on structural steel building construction. As a leading Engineering, Procurement and Construction Contractor, Gayathi has for the last decade been undertaking turnkey projects from concept to completion. It has built a solid reputation in UAE as reliable contractor who can be trusted to complete projects on time and within budget, while adhering to the

highest standards of quality and safety. Gayathi is primarily engaged in structural steel buildings construction for industrial and commercial applications including MEP works and has completed more than a hundred projects within the short span of ten years. Dubai Municipality, Abu Dhabi Municipality, TECOM, JAFZA (PCFC-Trakhees), Dubai Investment Park, DIC, DMW and Hamriya Freezone are some of the authorities in the UAE that Gayathi has experience in working with. With a workforce that

is trained in the most up to date in Civil and MEP construction practices, and having the experience and technical resources to back it, Gayathi can guarantee successful completion of even the most complex of projects.

Going beyond steel buildings, Gayathi builds lasting relationships by providing quality construction services at the best possible value, all the while assuring the optimum standards of quality, safety, and accountability.

Quality Assurance/ Quality Control

We adhere to superior codes of quality, both in terms of materials used and workmanship. Prior to commencement of a project, we develop a Quality Management Plan that covers in detail the entire quality requirements of the project. Project Managers are responsible for adherence to these plans. Regular inspections and quality audits are conducted to uncover deficiencies, and to take corrective action, so that the final structure meets the defined acceptance criteria.

Environment Friendly

As a socially responsible organization conscious of the need to conserve the environment, Gayathi Constructions complies fully with the highest standards of sustainable development, and strictly adheres to the Green Building Regulations & Specifications promulgated by the authorities. All our construction activities are put through rigorous periodic audits to minimize the direct and indirect impact of our activities on the environment, both short term and long term.

Safety

From work environments to employee protection, we take safety seriously. We believe safety is everyone's responsibility. Every member of our team is tasked with taking personal ownership of one's own safety as well as that of others. We put stringent safety policies and procedures in place, with safety officers held accountable for adherence. We regularly monitor whether these are being followed in actual practice. Our goal is to ensure zero incidence of safety lapses.

THE STORY SO FAR

Established in 2005 in Dubai and having office in Abu Dhabi, GAYATHI is a professionally managed engineering firm that specializes in structural steel building design and construction. In a short span of just ten years GAYATHI has successfully completed over a hundred turnkey projects in the UAE, earning a reputation for reliability, resourcefulness, and strict adherence to timelines and cost estimates
